Stainless steel and Acid-proof steel sinks

Our range includes a comprehensive selection of steel sinks, with standard sizes listed in the table below.

- Stainless steel, grade AISI 304.
- Acid-proof stainless steel, grade AISI 316.
- Sinks are welded to the steel worktop.
- Overflow valve available upon request.
- In addition to standard dimensions, custom sizes with fully client-specified measurements are also available.
- You can find more information about stainless steel and acid-proof steel from the Worktop materials page.
- Despite their name, the chemical resistance of steel sinks is limited. Please contact our experts when selecting sink materials.
