Tall cabinet with pull-out door

- A pull-out cabinet is a space-saving storage solution.
- The cabinet features a pull-out mechanism where the drawers slide out along with the door.
- The mechanism is highly practical, for example, between two workstations or next to a fume cupboard, as the cabinet can be accessed from both sides when opened, providing full access to its contents.
- A ventilated model suitable for chemical storage is available on the VISU Chemical Cabinet page. In addition to ventilation, this cabinet features internal drawers with polypropylene trays designed for chemical storage.
- For Standard solutions we have selected high-quality and most commonly used options in terms of dimensions and materials.
- Custom solutions are always tailored to the customer's needs.

Our experts are happy to assist you in selecting the right product.

Standard

Description	Product code	Standard dimensions [mm]			Additional information
		Width	Depth	Height
