

Island Workbench

The island workbench maximizes efficient use of the laboratory's central area.

- The island workbench is the most versatile furniture solution in the VISULab range, as it can incorporate nearly all features of the collection.
- The central installation unit provides a fixed pathway for building systems and utilities.
- In the workbenches, there are no vertical legs at the front edge, which improves ergonomics, especially for seated work.
- Under-desk cabinets are attached to the table frame, leaving the floor space free and allowing the cabinet to be repositioned under the work surface. The cabinet can also be removed and relocated entirely under a different work surface.
- For standard solutions, we have selected high-quality, commonly used options in terms of dimensions and materials.
- Custom solutions are always tailored to meet the specific needs of the customer.

Feel free to contact us, and our experts will be happy to help you choose the right solutions.

adjustment

Custom

In addition to standard models, we also manufacture workbenches according to customer specifications. In custom solutions, dimensions, materials, and features are entirely up to the customer.

Feel free to ask our experts for more information, and let's design the right solutions together!

Additional information

Installation method	Free-standing on the floor, adjustable pads as standard. Sink tables need to be mounted.
Materials	<p>Worktop material is acid- and chemical-resistant solid laminate (T2). Other options are also available; please read more on the Worktop Materials page. The frame is made of powder-coated steel to meet laboratory environmental requirements.</p> <p>An optional top shelf is standard in 18 mm P5 class chipboard with high-pressure laminate surface.</p>
Colour	Standard white, other colours by order.
Load capacity	<p>Manual height adjustment: Recommended load capacity is 200 kg per table, which typically provides sufficient rigidity considering sway and deflection of the surface. Maximum load capacity is 400 kg per table; this value should not be exceeded. Higher load capacities are also possible; please inquire with our experts for more information.</p> <p>Electric height adjustment: 240 kg per table (2 electric legs). Higher load capacities are also possible; please inquire with our experts for more information.</p>
Height adjustment	<p>Manual adjustment: Stepless adjustment from 750 to 900 mm.</p> <p>Electric adjustment: Stepless adjustment from 750 to 1000 mm (programmable), with 3 memory locations, soft start and stop. The table comes standard with a collision detection sensor.</p>
By order	Upper cabinets, electrical systems, lighting, and taps with sinks are designed and installed as needed.
LED light strip (optional)	Neutral white 4000 K, light output 1080 lm/m, power consumption 9.0 W/m, CRI >80, IP66
