

Steel plinth

- A steel plinth acts as the base for tall furniture or under-desk furniture when they are not fitted to the desk frame.
- A structure that is open and high enough guarantees easy cleaning.
- When used with under-desk furniture, the base enables maximum storage space, because the worktop can be secured at the top of the furniture.
- For Standard solutions we have selected high-quality and most commonly used options in terms of dimensions and materials.
- Custom solutions are always tailored to the customer's needs.
- Note. The figures in the table below indicate the worktop dimensions.

Standard

Description	Product code and standard depth [mm]	Width [mm]	Height, mm
Steel tube base	RJ-W-440-H	300-2400	250
	RJ-W-600-H	300-2400	250

Custom

In addition to Standard solutions, we also implement steel plinths according to customer's wishes. In Custom solutions, dimensions, materials and equipment are completely up to the customer.

Feel free to contact our experts and we will find suitable solutions together!

Features

Installation	Free-standing on the floor, adjustable legs standard. Note. Tall furniture and desks with sinks must be secured in place.
Materials	Powder coated steel. Also available in stainless steel.
Castors	The base can be equipped with castors (4 turning, of which 2 can be locked).
By order	A worktop can also be installed on the steel plinth without under-desk furniture, making it a convenient base for equipment or device, either with adjustable legs or castors.
