Erlab Captair Smart

filtering fume hood

- Erlab Captair Smart offers the most advanced molecular filtering technology available. A number of different types of chemicals can be filtered simultaneously, so your work is not restricted by having to use only specific types of filters.
- The Erlab Captair Smart filtering fume hood has its own filter and fan. This means that gases, solvents and particulate matter can be processed safely without having to be connected to the property's exhaust air ducts.
- For more information about the product, please find manufacturer's website at https://www.erlab.com/en/filtering-chemical-fume-hoods/.

Our experts will be happy to help you find the suitable solutions.
