Erlab Captair Smart filtering storage cabinet

Eliminates toxic and harmful fumes

The filtering storage cabinet provides a steady flow of air through the cabinet, taking dangerous fumes through the filters and returning clean, filtered air back into the room.

- Contains its own filter and fan
- Continuously cleans the indoor air of the laboratory too.
- Not connected to HVAC systems, so the cabinet can be placed wherever it is needed.
- The cabinet has various compartments, so different kinds of chemicals can be stored in it.
- Drip basins at the bottom.
- Transparent, lockable doors.
- 3 models to choose from, can be mounted on floor or wall or on a surface on which the fume hood is placed.
- Can be connected to the eGuard application
