OPPILab Teach Basic

Transparent walls make it easy to follow the teacher´s demonstration

OPPILab Teach Basic fume cupboard is the perfect solution for schools and science educators. Its transparent walls make it easy for students to follow teachers' demonstrations.

- A lightweight fume cupboard equipped with castors can be moved easily to wherever it is needed.
- All walls are made of transparent polycarbonate.
- The fume cupboard is equipped with LED lights and sockets for greater usability.
- The base has a laminate shelf and a polypropylene drain basin for storing chemicals during use.
- The fume cupboard has an optimally designed front edge, continuous handle and side profiles to optimize air flow.
