

Trays

- Grannells plastic trays are trays known for their durability and versatility, which can be stacked neatly inside each other when not used, and by turning them, on top of each other.
- The material is polypropylene, which is easy to keep clean, and also resistant to chemical and knocks.
- The multicolored trays make it easy to keep things in order in a classroom or storeroom. They are also excellent for keeping in student work.
- A number of colors and depths, accessories and divider trays are available. Standard colors are blue, red, yellow and green, but other colors are also available by order.
- The same trays fit both [cabinets](#) and [trolleys](#).
