

## Trays

- Grannells plastic trays are known for their durability and versatility, and can be stacked neatly inside each other when not used, and by turning them, on top of each other.
- The material is polypropylene, which is easy to keep clean, and also resistant to chemical and knocks.
- The multicolored trays make it easy to keep things in order in a classroom or storeroom. They suit well for keeping student work in them.
- A number of colours and depths, accessories and divider trays are available. The standard colours are blue, red, yellow and green, but other colours are also available on request.
- The same trays fit in both [cabinets](#) and [trolleys](#).

### Product information

| Product code | Standard dimensions width-depth-height [mm] |
