

Tray cabinets

- A tray cabinet is narrow and therefore saves space, but the space is used more efficiently than an ordinary cabinet with shelves.
- The multicolored trays make it easy to keep things in order in a classroom or storeroom. They are also excellent for keeping in student work.
- The cabinet is available with solid doors, framed glass doors or no doors.
- The same trays fit both cabinets and transfer trolleys. Both are delivered assembled and ready for use.
- Tray cabinets can also be made in tailored sizes, within the limits set by the trays. The size and number of trays can also be tailored according to individual needs.

Product information
