VISU active chair

Movement and ergonomics for different workstations

VISU active chair is designed to improve working ergonomics and increase the activation of the core muscles during sitting work. Even with a small movement, the user can keep the core active while sitting.

- The flexible seat mechanism promotes the well-being of your back.
- Lockable castors ensure that you will sit safely.
- Available with two seat alternatives and with three different height options.

Ask our experts for more information, we´ll be happy to help you choose the suitable chair!
