VISU Walk-in

Walk-in fume cupboard with standard specs

The VISU Walk-in fume cupboard enables the safe processing of harmful materials and gases.

- **Open to the floor** – With double doors under the sash. Inside you can place a desk with necessary dimensions and equipment. If needed, the castors of the equipment desk are also fully lockable and with adjustable legs.
- **High quality** – Materials for professional use and finished design, almost maintenance-free.
- **Ergonomic** – Clear and optimal design of details, electronic height adjustment if necessary.
- **Safe** – The air suction is on the full width of the fume cupboard on both the upper and lower edge of the inner back wall.
- **Ecological** – Designed and manufactured responsibly in Finland, made to last for decades.

Are you looking for a fully customisable walk-in fume cupboard? Check out VISU Space, a customisable walk-fume cupboard that is tailored just for you!

The VISU fume cupboards are always equipped according to the customer's needs. Feel free to contact us and we will design suitable solutions together!

Selection of suitable fume cupboard

See the table below to select different properties. We always equip the fume cupboards according to the customer’s needs. Feel free to contact us, and we will design suitable solutions together!

Delivery and installation

The walk-in fume cupboards are basically assembled on site, due to their large size. The fume cupboard must be connected to a separate exhaust air duct. The water supply, drainage, gas and electricity work must be performed by professionals. An automatic air flow alarm and control system can also be included in the delivery.
