MS Bench

Sound-insulated and ventilated workbench, ideal for devices such as roughing pumps

Sound-insulated and ventilated Mass Spec Bench is ideal for devices such as roughing pumps. Suitable for typical instrument setups used in mass spectrometry.

- Inside the cabinet, a pull-out tray allows easy maintenance of the device.
- Instead of a pull-out tray, the device can also be placed on a fixed shelf with vibration-damping feet.
- Power outlets and a fan switch are located inside the equipment cabinet.
- The upper section serves as an instrument platform, and the table's structure ensures excellent stability.
- The worktop material is acid- and chemical-resistant solid laminate.
- Lockable casters ensure easy mobility.
- Our standard solutions feature the most commonly used dimensions.
- Custom solutions are always tailored to the customer's needs.

Standard

Description	Standard dimensions [mm]			Additional information
	Width	Depth	Height	
MS Bench	1000	800	840	drawers + equipment cabinet, on casters

Width and depth are worktop dimensions.

Custom

In addition to standard models, we also manufacture benches according to customer specifications. In custom solutions, dimensions, materials, and features are entirely up to the customer.

Feel free to ask our experts for more information, and let's design the right solutions together!
