Steel Tube Frame

Furniture support frame

- Steel tube frames are ideal as support structures for base cabinets when they are not suspended from a bench frame.
- They can also be used as support frames for tall cabinets.
- The open-bottom design and sufficient ground clearance ensure easy cleaning and good hygiene.
- When used with base cabinets, the frame helps maximise storage space, as the worktop can be supported directly on top of the cabinets.
- Material: Powder-coated steel
- Supplied as standard with adjustable feet; castors are available as an option.
- Our standard range includes the most commonly used sizes and configurations.
- Custom solutions are designed and manufactured to meet individual customer requirements.

Note: Steel tube frames are supplied only as part of a complete furniture solution and are not available for separate purchase.

Standard

Description	Product Code	Standard measurements [mm]		
		Width	Depth	Height
Steel tube frame	RJ	300-2400, support leg will be added to 1200 or wider products	Based on the furniture	150 or 250

Custom

In addition to our standard models, we also manufacture workbenches according to client specifications. In custom solutions, dimensions, materials, and features are entirely up to the client.

Feel free to ask our experts for more information, and let’s design the right solutions together!

Additional information

Installation	Freestanding on the floor, additional levelling feet are included. Please note that tall cabinets and sink benches must be securely fixed in place.
Materials	Powder-coated steel.

Castors	The frame can be fitted with castors (4 swivel castors, 2 of which are lockable)
On request	A worktop can also be installed directly on the frame, creating a practical equipment stand available with either adjustable levelling feet or castors. Read more about Equipment Stand.
