

Weighing tables

- As the name suggests, weighing tables are designed for vibration-sensitive equipment, such as scales. The high mass and damping pads ensure stability and functionality in precision work environments where minimal disturbance is crucial.
- The materials are designed to be cleaned easily.
- For standard solutions, we have selected high-quality, commonly used options in terms of dimensions and materials.
- Custom solutions are always tailored to meet the specific needs of the customer.

Standard

Description	Product code	Standard dimensions [mm]			Weight [kg]	Additional information
		Width	Depth	Height		
Weighing table	EVA	550	550	750, 900	approx. 100	metal frame
Weighing table	EVB	900	550	750, 900	approx. 300	stone legs
Weighing stone to a worktop	EVC	300	300	30	approx. 10	
Weighing table	EVD-S	550	550	680-970	approx. 100	electric height adjustment
Weighing table	EVD-S	900	550	680-970	approx. 160	electric height adjustment
Weighing table	EVD-S	1200	550	650-940	approx. 170	electric height adjustment

Custom

In addition to standard models, we also manufacture weighing tables according to customer specifications. In custom solutions, dimensions, materials, and features are entirely up to the customer.

Additional information

Installation method	Freestanding on the floor, to be installed so the table does not touch other furniture or walls. Includes damping pads.
Materials	Powder-coated steel, acid-resistant solid laminate, and polished granite.
Additional info EVD (electrically adjustable)	Load capacity: 150 kg. The specialized castors are fully retractable into the structure. When retracted, the castors function effectively as table legs.
By order	The weighing table or its stone worktop can also be embedded into a laboratory desk or fume cupboard. It is possible to add three IP21 Schuko outlets to an electrically adjustable EVD weighing table.
