

Sinks made of stainless steel and acidproof steel

The collection includes a wide range of steel sinks. The standard sizes are shown in the table below.

- RST is stainless steel, quality AISI 304.
- HST is acidproof steel, quality AISI 316.
- Usually the sinks are welded to the steel worktop, but sinks are also available without worktop.
- Overflow valve by order.
- Tailored dimensions are also available.
- Despite their name, steel sinks have limited acid resistance. Please contact our experts when choosing sink materials.

Product information, stainless steel

Description	Product code and standard dimensions width-depth-height [mm] (depth measure horizontally)
Stainless steel sink	RSTA-180-400-200
	RSTA-290-340-200
	RSTA-340-400-200
	RSTA-512-408-200
	RSTA-512-408-250
	RSTKA-150-300-150 (dripcup)

Sinks are also available in special sizes.

Product information, acidproof steel
