Worktables & sink tables / työ- ja allaspöydät

Ergonomics, hygiene and comfort while working are becoming increasingly important in the workplace. Therefore, the basis of a well-operating workplace is stainless steel equipment which is long-lasting and easy to service.

The standard depth of the work and sink tables are 600 mm and 700 mm. The stainless steel working plane is made of 1.25 mm brushed steel plate with a profile ridge height of 30 mm. A stainless steel supporting frame underlies the working plane. It is possible to attach a 60–200 mm high splash back plate to the plane's back edge.

You will find a suitable sink for any purpose from our broad range of standard sized sinks. The sinks are equipped with a 1½" or 3½" foot valve opening. Accessories such as a sedimentation container, ball valve and overflow system improve hygiene and simplify maintenance.

The strong frame of the work and sink tables is made of stainless steel rectangular tubes. The height of the frame's legs can be adjusted +/- 25 mm. The electric height adjustment is also possible.

Shelves, cupboards and drawers can be installed into the frames, thus allowing for a more effective use of space and improve functionality.

Work and sink tables as well as any compatible accessories can also be made of acid resistant stainless steel AISI316.

Ergonomia, hygienia ja työskentelymukavuus ovat yhä tärkeämpiä ominaisuuksia työpaikalla. Laadukkaiden RST-tuotteiden ominaisuudet, kuten pitkäikäisyys ja huollettavuus mahdollistavat toimivan työpisteen.

Työ- ja allaspöytien vakiosyvyyydet ovat 600 mm ja 700 mm. Ruostumattomasta teräksestä valmistetut työtasot ovat harjattua 1,25 mm teräslevyä, profiilireunan korkeus on 30 mm. Tason takareunaan voi asentaa 60-200mm korkuisen roiskesuojalevyn.

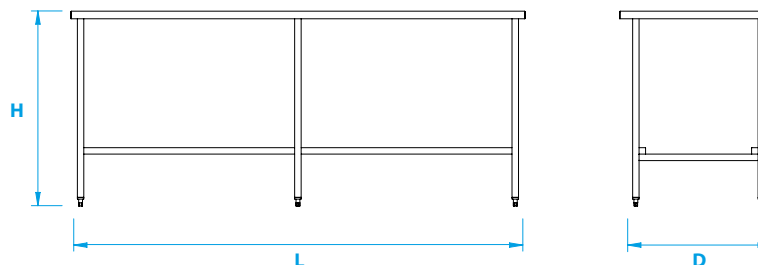

Vakiomittaisten altaiden laajasta tuotevalikoimasta löydät sopivan kokoisen altaan joka tarkoitukseen. Altaat on varustettu 1½ tai 3½ tuuman poistoaukolla. Lisävarusteet kuten saosteastia, palloventtiili ja ylivuotojärjestelmä parantavat hygieniaa ja helpottavat puhdistusta.

Myös runkorakenne on valmistettu ruostumattomasta teräksestä. Rungon jalkojen korkeus on säädettävissä välillä +/- 25mm. Sähköäätöinen korkeussäätö on myös mahdollista.

Tehokasta tilankäyttöä ja funktionaalisuutta tarjoavat runkoon asennettavat hyllyt, kaapit ja laatikot.

Työ -ja allastasot, kuten myös useat lisävarusteet, on mahdollista valmistaa haponkestävästä ruostumattomasta teräksestä AISI316.

Shelves / hyllyt

The heavy-duty stainless steel shelves with a strong construction can be easily cleaned. The product line contains shelves with ceiling, table, wall and floor mounts. Both full and vented shelves are used.

It is easy to match wall mount shelves with the needs of different rooms. Easily adjustable shelf girders and wall grooves are made of anodised aluminium, the space between the girders is 1200 mm. Wall shelves are made of 1.0 mm stainless steel and they can be either full or vented shelves. The bearing capacity of the shelves is 100–150 kg, dependent on the length. Standard depths are 300, 400 and 500 mm.

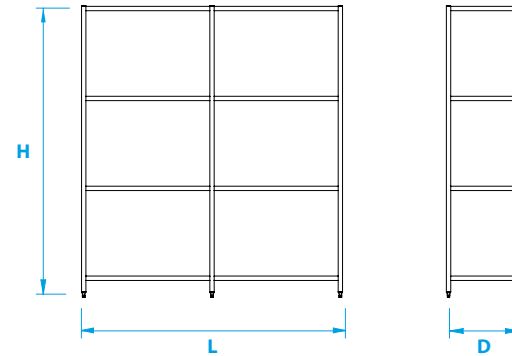

The floor shelves have legs with an adjustable length. The tiers are either adjustable (in 50 mm steps) or fixed. Standard depths are 400, 500 and 600 mm.

Vankkarakenteiset ruostumattomasta teräksestä valmistetut hyllyt ovat helposti puhdistettavissa. Tuotevalikoimaan kuuluvat seinä-, katto-, pöytä- ja lattiakiinnitteiset hyllyköt. Hyllyjä on saataavana sileinä tai ritiämallina.

Seinähyllyjä on helppo sovittaa erilaisten huoneiden tarpeisiin. Hyllynkannakkeet ja seinäkiskot ovat anodisoitua alumiinia ja ne on helposti säädettävät. Kiskojen etäisyys toisistaan on 1200mm. Seinähyllykön tasot ovat 1.0mm paksuista ruostumatonta terästä ja ne voivat olla sileitä tai ritiämallia. Hyllytasojen kantavuus on pituudesta riippuen 100-150kg. Vakiosyvyydet ovat 300, 400 ja 500mm.

Lattiahyllyt on varustettu säätöjaloin. Lattiahyllykön tasot ovat kiinteät tai säädettävät 50mm säätövälein. Vakiosyvyydet ovat 400, 500 ja 600 mm.

Trolleys / vaunut

Our range of products includes durable trolleys that have been created in cooperation with the users. With the help of trolleys, work runs smoothly on various tasks. The trolleys have four rotary wheels and two of them can be easily locked. Trolleys with antistatic wheels are available to order.

A single plane of a trolley has a bearing capacity of 100 kg. The planes have a useful profile ridge. For example, it is easy to transport big boxes to the warehouse.

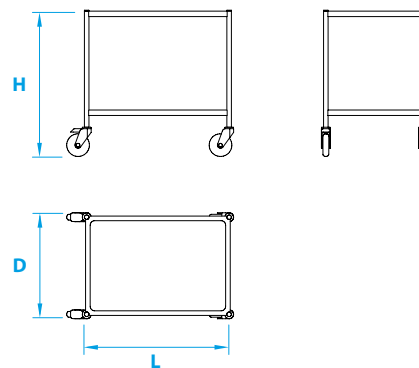

The product line is complemented by trolleys for tools and instruments and warehouse trolleys.

Tuotevalikoimamme vaunut ovat kestäviä ja ne on suunniteltu yhteistyössä käyttäjien kanssa. Vaunujen avulla on helppo kuljettaa tarvikkeita paikasta toiseen. Yleisvaunuissa on neljä kääntyvää pyörää, joista kaksi on helposti lukittavissa. Antistaattisilla pyörillä varustettuja vaunuja on saatavilla tilauksesta.

Hyllyvaunun tason kantavuus on 100 kg. Tasoissa on kätevä profiili-reuna, jonka ansiosta esim. isojen laatikoiden kuljetus varastoon on helppoa.

Tuotevalikoimaa täydentävät erilaiset väline- ja varastovaunut.

Cupboards / kaapit

We manufacture cupboards for the different needs of hospitals and laboratories. Standard production includes floor cupboards with shelves, cupboards for cleaning equipment and wall-mounted cupboards.

The tiers of cupboards with shelves can be adjusted in 50 mm increments. The tiers can easily be removed for cleaning.

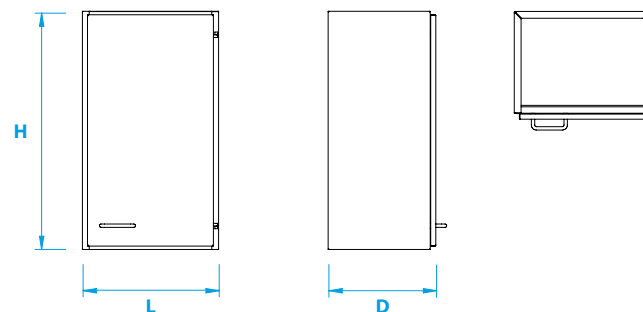

Cupboards with 1 or 2 doors have 1–3 shelves.

Valmistamme kaappeja sairaaloiden ja laboratorioiden erilaisiin tarpeisiin. Vakiotuotteisiin kuuluvat lattiakaapit hyllyillä, siivouskaapit ja seinäkaapit.

Kaappien tasoja voidaan säätää 50 mm välein. Tasot on helppo poistaa puhdistusta varten.

Yksi- ja kaksioviset kaapit sisältävät 1-3 hyllyä.
